FILMMAKING

— CLASSIC RANGE —

For years now Activate has been empowering tomorrow's content creators and leading the way in teaching young people how to tell stories using devices and digital tools.

Device-based Filmmaking

Basic

Our innovative way of filmmaking draws on the endless creative capabilities of devices such as iPads and the never-ending selecting of apps. Here you'll work with professional filmmakers and learn how to turn your mobile device into an incredibly powerful filmmaking tool.

Advanced

Understand the basics of filmmaking and want to take your film projects to the next level? Here you'll get to know the technology, techniques and tools needed to produce beautiful looking films with mobile devices.

Themes

Activate offers an exciting range of themed workshops ideal for any genre of holiday programming! Workshops can include special effects makeup, costumes, and visual effects applications. Your idea not on the list? Let us know!

Zombie Invasion
Superhero Battle
Fantasy Fairytales
Action Hero
Alien Invasion

Anime Hero
Music Video
Wizards and Warlocks
Cops and Robbers
Dystopian Survivors

Stop Motion Animation

Basic

In this workshop participants learn the basic techniques of stop motion animation. These skills are focused on giving life to an inanimate object like plasticine. The principles include; motion, morphing and walk cycles.

Advanced

Once you have the basics of stop motion animation conquered, it's time to focus on more complex techniques. In our advanced stop motion workshop, participants learn how to animate facial movements and have the opportunity to voice their very own character.

YouTube

Basic

Believe it or not, successful YouTubers make money! Participants in our YouTube workshop learn how to create, produce and edit content for their own YouTube channel based on popular online trends like gaming, unboxings, reactions and reviews.

Advanced

This course is designed for those who have a YouTube channel and want to get more clicks, more views, and more subscribers. Understand how the backend of this incredible platform works.

Hollywood

Ever wondered how they do it in Hollywood? Now you can find out! Learn awesome visual effects which will have your audience super impressed! Fly, teleport and go invisible. Here you'll learn how simple filmmaking tricks can make your movies shine.

Making Holograms

Build your own hologram using simple materials and bring it to life with specially designed holographic videos. Then use green screen and special effects to create a hologram of you! You'll be amazed at how realistic they look!

Extreme Filmmaking

Using hi-definition waterproof cameras, this action packed filmmaking workshop explores what is possible when attaching a camera to pretty much anything which engaging in high-energy activities. Participants then edit together their footage to create a exciting music video montage.

Interview Your Hero

This workshop is designed to introduce young minds to interviewing techniques and documentary filmmaking. Select an author, superhero or celebrity, and then learn how to correctly shoot an interview in a fun and exciting way!

Slow and Fast Filmmaking

This science-driven filmmaking workshop focuses on capturing high-speed motion from a series of amazing experiments with devices and slowing them down to reveal the magic behind the motion!

Details

1.5hr Workshop

Our 1.5hr workshops focus on getting young minds excited about content creation and giving them the technical skills to get started.

Cost:

1.5hrs

\$500+GST

3hrs

\$850+GST

3hr Workshop

Our extended 3hr workshops allow participants to put the technical skills into practice and produce their very own project.

Age: 6-17yrs

Max: 20 participants

Travel: 79c/km

FILMMAKING

— INNOVATION RANGE —

We like to push the boundaries with content creation and what's possible. This range of workshops are sure to ignite the imagination of the next generation through emerging technologies.

ROBOTICS

Drawing on the power of today's robots, we are preparing tomorrow's generation by designing and constructing robotic solutions in a way that excites young minds.

RoboWars LIVE

Using the incredible Mindstorm EV3 robots, participants learn how to battle their robots in an arena, and make modifications whilst filming the action taking place. They then compile the footage to make an action-packed Robowars TV episode!

Lego Mindstorms EV3

Harness the power of LEGO's EV3 robotic system in this engaging set of workshops designed to challenge and inspire the next generation of inventive thinkers. Our robotics programs incorporate design-based thinking within a fun and educational setting to solve the problems of tomorrow.

Available Workshop Options:

- Build and Race
- Build and Collect
- Build and Battle
- Build and Program
- Mars Challenge
- Farm Challenge

Sphero (1.5hrs ONLY)

Sphero robots are extremely versatile when harnessed in the right way, and are incredibly engaging for the young tinkerers of tomorrow. Our range of Sphero workshops cover everything from science to art, providing innovative educational experiences which just feel like fun!

Details

1.5hr Workshops

Our 1.5hr workshops focus on getting young minds excited about robotics and giving them the technical skills to get started.

Cost:

1.5hrs

\$500+GST

3hrs

\$850+GST

3hr Workshop

Our extended 3hr workshops allow participants to put their technical skills into practice and solve more challenging problems.

Age: 6-17yrs

Max: 15 participants

Travel: 79c/km

Building Gaming Apps

Our incredible range of gaming app workshops allow participants the opportunity to build and code their very own mobile gaming app. Constructed using a specially designed iPad app, participants can build characters, levels and obstacles then put their friends and family members to the test.

Available Workshop Options:

Flappy Bird
Space Shooter
Geometry Dash

Augmented Reality

Begin to understand the power of augmented reality (AR) technology in these fun and exciting workshops. AR layers digital content over our existing reality, seen through a device such as an iPad, opening up a world of endless possibility.

Available Workshop Options:

AR Scavenger Hunt
AR Trading Cards
AR Fashion

Details

1.5hr Workshop

Our 1.5hr workshops are focused on getting young minds excited about game design and introductory skills to get them started.

Cost:

1.5hrs
\$500+GST

3hrs
\$850+GST

3hr Workshop

Our extended 3hr workshops allow participants to put the technical skills into practice and produce their very own game.

Age: 6-17yrs

Max: 15 participants

Travel: 79c/km

GAMING

Game design perfectly combines creativity and technical skills to bring to life anything young minds can conjure.
